FIND THE BEST SOLUTION TO IMPROVE EFFICIENCY IN YOUR CREDIT ANALYSIS!

SISCA is a credit analysis tool that combines technology and expertise in data processing to provide predictions of credit behavior based on credit reports. It does this by reading IDeb files from OJK and presenting the data in an intuitive dashboard. SISCA assists lenders in evaluating the creditworthiness of individuals and businesses more efficiently and accurately. One of the main advantages of SISCA is its ability to streamline the previously time-consuming credit analysis process. With SISCA, companies can quickly review individual customer files, generating the necessary credit information without spending significant time and effort.

JSON data from IDeb OJK is input into our application, where SISCA processes it using various logic to provide a simplified and easily readable summary of the IDeb data and reports.

Why Choose SISCA?

Efficiency:

SISCA optimizes time and resources by presenting customer data concisely through an intuitive dashboard.

Concise Information:

Providing essential information briefly enables credit analysts to evaluate customer risks and potentials quickly.

Improved Decision-Making:

SISCA provides structured data for more accurate credit decisions.

Risk Reduction and Compliance Maintenance:

By offering comprehensive information about customer credit profiles, SISCA helps manage credit risks while adhering to applicable regulations.

Prescreening of Prospective Debtors

SISCA enables fast and accurate prescreening of prospective debtors through automated credit data analysis, enhancing efficiency and decision-making for financial institutions.
